

MARCO APOLLO

THREE COMPARTMENT DADO & SKIRTING TRUNKING

Available in both dado and skirting versions, Apollo trunking offers either three or four separate compartments for power, data and telecommunications cables. The four-compartment Apollo trunking provides two large centre sections, ideal for applications where larger cabling needs exist.

Marco Apollo trunking has several benefits for the contractor which will help keep installation times and costs to a minimum. The outer compartments have been specifically created to provide maximum capacity for data cables. The Marco socket boxes are designed to make installation of accessories quick and easy. They are available in two sizes, the standard 35mm deep version, and a 25mm deep version which is available for applications that require more wiring space.

Wide range of colours available
