

Marco Cable Management has further enhanced the company reputation as one of the leading British manufacturers of cable management systems, by the continued growth in innovative products and supportive accessories.

The Steel Wire Cable Tray accessories have been further expanded to include a new range of fast fix designs. These enable a reduced installation time on-site.

These additions allow Marco to offer a full range of accessories for every Steel Wire Cable Tray installation requirement.

The Fast Fix Universal Strut Clip allows the tray to be fastened to strut both quickly and easily, whilst maintaining a sturdy support. Supplied in packs of 50, the Strut Clip is made secure with one turn of a screwdriver and can be utilised in both new build and re-fit schemes, where strut channel is specified. Made from sprung steel, the Strut Clip has a chromium-free geomet finish. This is used specifically for small accessories, providing a smooth finish.

Latest accessories also include the Quick Fix Riser, used to attach the tray to the wall when being installed vertically in a rising situation; the Divider Joining Bracket, used to join two lengths of steel segregating divider together; the Multi Fix Plate – this part can be attached to the side or bottom of the tray and can attach light fittings or accessories; the Universal Support Bracket, used for attaching mounting boxes or industrial switches to the tray and the Earthing Terminal, ensuring a safe earth bond is achieved within the installation.

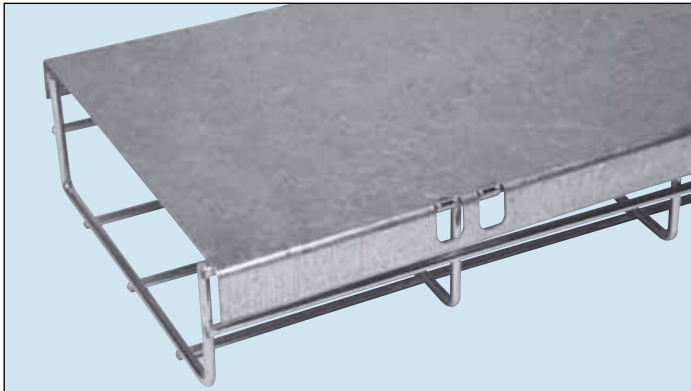

Standards

Marco Steel Wire Cable Tray conforms to the following standards:
BSEN 61537:2007, IEC 61537

STEEL WIRE CABLE TRAY accessories

MCL - STEEL WIRE CABLE TRAY LID
